

Dedicated Server

Windows Server 2003

High Speed Backbone

Our pre-configured **Intel XEON Quad Core Dedicated Servers** powered by the Latest version of **Windows 2003** are extremely versatile and can be used for a variety of purposes. A dedicated server can become a web server, be used as part of an e-business solution or it can form the backbone of a corporate Intranet. Dedicated servers also allows a reseller to become a virtual web host, a live-streaming broadcast machine or anything else that requires great reliability, speed and top level of security.

WHY choose us as your Windows Dedicated Server Solutions Provider

Reason No 1 : Value for Money

Why pay for all the frills and extras which you don't need. At e-globalhosting we provide you with Dedicated Servers at Affordable Prices while not sacrificing quality and server performance.

Reason No 2 : We Specialize in Windows Hosting Solutions

We don't claim to be "Jack of All trades", instead we focus and specialize in offering Advanced Windows Dedicated Server Solutions.

Reason No 3 : Latest Hardware

We only use the latest Intel Xeon Quad Core Processors and Motherboards. We also support multiple RAID configurations on the server at NO additional cost. In addition our basic server setups come with a generous amount of RAM allowing you to run multiple applications concurrently.

Reason No 4 : Extensive Server/Software Upgrades

We also can also provide rental on Microsoft Server Software solutions like MS SQL 2005 or upgrades to Windows Server R2 edition at a very low monthly cost with no SETUP fees.

Benefits of Our Dedicated Server Hosting
