Microsoft® SQL Server™ 2005

Database Hosting

SQL Server 2005 represents a dramatic step forward in supporting the most demanding enterprise systems in the world. SQL Server 2005 is designed to increase security, scalability and availability to enterprise data and analytical applications, while making them easier to build, deploy, and manage. By deploying SQL Server 2005 in your application, the extended strengths of SQL 2000 to SQL 2005 will maximize IT productivity by reducing the complexity of developing and supporting database applications.

MS SQL 2005 Packages

Starter Plan	Bronze Plan	Silver Plan	Gold Plan
- **100MB**	- **500MB**	- **1000MB**	- **2000MB**
- 60MB Data	- 300MB Data	- 600MB Data	- 1200MB Data
- 40MB Log	- 200MB Log	- 400MB Log	- 800MB Log
RM 398/yr	**RM 998**/yr	**RM1498**/yr	**RM2498**/yr

MS SQL 2005 Features

Performance Deliver results quickly and provides relevant business information fast when using applications with SQL Server 2005.

Extensibility Extend the reach of your applications with SQL Server's built-in extensibility provided through rich application program interfaces (APIs) and mobile device support.

Integrated Platform Develop and manage applications quickly and easily with Visual Studio and CLR integration.

ADO.NET version 2.0 From new support SQL types to Multiple Active Result Sets (MARS), ADO.NET in SQL Server 2005 will evolve dataset access and manipulation to achieve greater scalability and flexibility.

Importance of MS SQL 2005

- Deploying enterprise applications that are more secure, scalable and reliable.
- Reducing the level of complexity of creating, deploying and managing database applications.
- Manageable cost without effecting the performance or scalability of the applications.
- Help to informed business decisions and increase productivity across the entire organization.
- Easier connection to internal and external systems by sharing data across multiple platforms, applications and devices.
